Museos Guide test museum

A fictional crafts museum prepared for App Review. Exhibits and texts are invented; pictures and narration are computer-generated. Stories are available in Russian, English and Uzbek. The same codes are on museos-review.pages.dev, one at a time.

How to test

1. Open Museos Guide. The interface is in Russian by default.
2. Tap the black button at the bottom of the first screen, “Сканировать код у входа” (Scan the entrance code), and scan the Museum entrance code on page 2. Please use the app’s scanner: the iPhone Camera app would open the link in Safari. The stories download, about 7 MB.
3. On “How to listen”, tap the blue button “Понятно, начать” (Got it, start).
4. On the museum home screen, tap “Сканировать код” (Scan code) and scan any exhibit code. The story starts playing. You can also type an exhibit number on “Ввести номер с таблички” (Enter number).
5. To switch to English, tap the gear icon at the top right of the museum home screen, then “Язык” (Language), “English”.

Exhibit numbers

1	Blue Plate	Синее блюдо
2	Embroidered Hanging	Вышитое панно
3	Adras Fabric	Ткань адрас
4	Carved Door	Резная дверь
5	Copper Jug	Медный кувшин
6	Dutar	Дутар
